DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-7 and 14-18 were deemed allowable in the previous Office Action (mailed 6/22/06). Paragraph 6 of that Action contains reasons for allowing these claims. Claim 8 recites a parallel batch reactor comprised of: a pressure chamber; a base having a plurality of wells with a closed lower end and upper open end; a cover configured to form a housing enclosing with the base, an inlet port in fluid communication with the pressure chamber; and *a flow restriction device comprising a plurality of check valves each configured to allow flow from the pressure chamber into one or more of said plurality of reaction wells and restrict flow from the one or more reaction wells into the pressure chamber.* The Examiner considers the reference Brenner to be the closest prior art. Brenner teaches a reactor having a pressure chamber, cover and base with wells, and an inlet port, but does not teach a flow restriction device as recited by Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
